11/12/31

To the Director of I & C. No. D. 29798. d. 12.12.31.
Requests him to forward for perusal the applica-
tions from the parties concerned together with
the Dt. Magistrate's recommendation thereon.

From the Dev of I. & C. No. 42. P. G. 12-13/31-32 d. 4/12-12-31. Yiviniti for reper & return the applications received from Messrs. Venkataswamy & Devappa Yagan together with the reports called by the Supdt of Industries, Yhimoga Division recommending the grant of the licenses in question.

Reper Asstt Secy's orders in the linked file.
Yuled for orders.
MAY 1.32.

6) Kind repe is invited to the Dev. Secy's Query ~~of the~~ of the 2nd Dec 31 on the linked file - It is clear now that neither the St Regle nor the Mt Council has been Consulted. Further a kind perusal of the applicatn of Mr S. Devappa will show that it is too laconic to admit of particulars re place &c being made out from it - The Stamp duty is not forwarded as required by the rules. The challans attached show that on 8/11/29 Rs 8/- was remitted to the Try and the balance on 6/12/30 more than a year after. The applicatn now comes about a year after. The wording in the challan is "Petrol license fee". Whether the amount has been passed on this Very age or not is not also clear. The Supdt has stated in his report that the first Stamped applicatn was made on 2-8-29 but what became of this applicatn is not known. This applicatn has not been enclosed with the file.

7) As this allbicatn of Mr Venkataswamy

Seria No.

Cantamo has requests M/S (1) License to Store 1020 gals of petrol in the godown Specified and (2) to Sell the Petrol at Sofar. Separate applications Shd have been recd for these.

8) As per Rule 1, Chap III, Part 4 of the Rules the applications Shd have been made to the Dt Magte & not to the Supdt of Customs as has been done in these cases

9) In these cases it is for orders if the Recommendations of the Dr of S & C may be sanctd.

11/1/32

Dev. Secy)

10) Please Enquire why the Dt Magte & the Mcply have not been Consltd in the matter.

Yest File No. 46 of 1931

General and Revenue Secretariat

From the Director of I & A. No. 62. P.Z. 12-13/31-32 d. 1.2.32. Ystate that all applications for licenses which can be granted only by Govt on by the officers appointed by them are dealt with by him in accordance with the G.O. of 30.1.25, that applications are made to Dt Magistrates or Presidents of Municipalities by parties direct only in cases where they are competent to issue licenses under the rules that the Dt Magistrates or Municipalities are not being consulted in the matter as there is no provision to that effect either in the Regulation or the Rules thereunder and requests that early sanction of Govt may be accorded to the grant of the licenses for storing petrol in favour of messrs. Venkataswamy & Durappa.

12) ~~Under~~ with Regd ~~to~~ orders on the previous page. Under Govt orders whether the draft in this & linked files may be issued.

M.V. ~~K~~
10.2.32.

13) Attention is invited to rule 2 of Chap III of the Rules under which licenses for the possession and transport of non-dangerous petroleum and of dangerous petroleum not exceeding 40 Gallons can be issued by Dt magistrates (or by Presidents as per note below)

14) In the two cases under adverence the licenses sought ~~for~~ are for storing 1000 Gallons of dangerous petroleum

2579
2827

[App. F. III—2

General and Revenue Secretariat — Genl. File No. 46 of 1931

Serial No.

Chap III

Under rule 2 licenses for dangerous petroleum exceeding 40 gallons can be granted by Govt or an officer appointed by Govt in this behalf.

1) The officer appointed by Govt in this behalf is the Director of Ind & Com as per Govt No. L.C 5210-76/Geo 2-24-4 & 30 Jan 1925. ~~Neither~~ The Dt Magistrate ~~or the Pres~~ or the Ind Presidents of Bangal & Mysore & the Vice President Samy Bd K have not been authorized in this behalf

Flag x

2) As reported by the Dir, there is nothing in the Regln or the Rules enjoining that the Dt Magistrates or the Municipalities should be consulted. The cases relate to Sagar and to the storage of dangerous petroleum of 1000 gallons. They have therefore to be granted by Govt. ~~Thing~~ The original drafts are subd for approval

KP
10/2/32

3) Rule 1 chapter III deals with "Applications for licenses" and Rule 2 deals with the "licensing Authority" Under rule 1 Application shall be made to the Dt Magte or such authority as the Govt may appoint. Under Rule 2 Govt have reserved the power to grant licenses for importation, possession and transport of dangerous

File No.

petroleum in quantities exceeding 40 gals and Govt may delegate this power to some officer of Govt: In their order D 30.1.25 Govt were pleased to direct that for 1.2.25 the work of administration of the petroleum legislation & the rules framed there be transferred to the Dir of I. & C. from the Ch. Inspr of Mines. It will thus be kindly seen that all applns for licenses shd have been made under Rule 1, to the Dt Magte or the Dr of I & C. This has not been done in the present cases as the applications are made to the Inspr of Explosives. The applns should have been rejected. The Dr of I & C cannot delegate the power vested in him to his Inspr to. He can only ask them to inspect & report.

2. No doubt as stated by the Dr of I & C in his letter D 1.2.32 (para 2) there is no specific provision either in the Rules or the legislation laying down that Dt Magte or Municipalities shd be consulted - It is only as a precautionary measure this is expected to be done.

3) As regards the Dr's observation that "it is not in those cases where the Dt Magte or the President of Municipalities are competent to grant licenses under the rules that applications are made, them direct by the parties concerned", I beg to submit that Rule 1 clearly lays down that the applications shall be made to Dt Magte or ... And does not restrict the scope of the clause confining this to only "applications of a part

General and Revenue Secretariat | File No. | of 193

Serial No.

kind". As such the view that D.M. Naga cannot receive applications for possession of dangerous petroleum exceeding 40 gals does not seem to be correct.

20) In the case of the two applications dealt with in this file the view of the deputy Secretary as recorded by me on 11.1.32 is a point for orders whether licenses can be granted as recommended by the Govt of India.

21) In the other two cases (of which files are called for) it is not clear whether the applications are addressed to the proper authority or not as the original applications are not seen.

Govt. Secy) 15/2/32

22) Law Secretary for favour of remarks.

15/2/32

15/2/32

23) Rule 1 of chapter III of the Petroleum Rules is a general provision relating to the licenses for the possession or transport of petroleum and provides for applications for such licenses being made either to the District magistrate or to the licensing authority, if any, appointed under rule 2, next following. It cannot therefore be

said that District magistrates are incompetent to receive applications in cases in which they are not the licensing authorities. I do not think the Dir of I & C in his letter of the 1st February says anything against the Competency of the District magistrates receiving such applications but says that the practice is that parties concerned apply to the Dt mgte or to the Municipalities only in such cases in which they are competent to issue licenses under the Rules. In other cases, the applications, though received by the Superintendents of Industries are dealt with by the Dir of I & C.

24) This practice ~~also~~ appears to be irregular. It is not clear if any ~~other~~ officer other than the District mgte, has been appointed ~~to~~ as a licensing authority under rule 2 of chap III. Such appointment under the rule ought to be specific and it is doubtful if under the G.O of 30th Jan 1925, the Director can be said to have been appointed as a licensing authority as required by rule 2 abovementioned. The fact that the Director though he 'deals' with applications for licenses, asks for sanction of Govt to grant the license, indicates that it is in reality the Govt that is granting the licenses.

General and Revenue Secretariat | File No. of 193

Serial No.

If therefore there is no licensing authority duly appointed under rule 2, the application for license for procession ~~or~~ transport ought to be made in all cases to the Dist: magistrate, himself and not to either the Supdt of Industries or to the Dir of I.t.C. ~~The~~ District magistrate will have then to forward the application to the Govt through the Director of I.t.C, since he is the administrative head under the G.O of 30th Jan 1925.

25) It is however to be observed that ~~the~~ simply because an application for license is presented to a wrong officer, it has to be rejected by Govt when it gets due notice of the application otherwise validly made. Even a plaint presented to a wrong Court is not thus rejected but it is returned for presentation to the proper Court. ——— . ——— ———

26) As regards the other defects pointed out in the Asst Secy's note of 11th January, it is no doubt true that the applications do not specify the particulars as required by rule 10 of chapter IV of the rules. But it is a matter for consideration if on this ground the licenses have to be refused when the required particulars are now before Govt in the reports of the Superintendent of Industries, and the Dir of I.t.C.

27) The one other point raised is about

Petrol License to Messrs. M. Venkata Swamy & Devappa.

G.O.C. File No. of 193 /. | General and Revenue Secretariat

FIRST No. 5794

224 / Law

the
Prepayment of fees by means of stamps
It is not clear which rule requires this
Cl (2) of rule 1 of chap III requires the fee to be paid in cash on receipt of a notice from the licensing authority that a license will be granted. The reason why in the case of applicant Devappa, the fee has been paid in two instalments, one of Rs 8/- on 8-11-29 and the other of Rs 4/- on 9-9-31 appears to be that he made an application on 2-8-29 which however could not be granted on account of the unsuitability of the storage shed and he seems to have renewed the application on 24-10-31 after he built a fresh shed.

2) In these circumstances, I think the licenses asked for may be granted as recommended by the Director and the procedure to be followed in such cases be clearly defined for future guidance

Dev Secy) 27/2

29) A. may be granted

30) B. action will be proposed separately.

Such applications likely to come in future in Sometg appertg the public Safety. 26/3/32

39 in blue pencil.

Kind reference is invited to para marked A to B in the note of the asst Secy - Law Dept.

The proper authority to whom applications for license should be made is the Dt Magte accdg. to law as no other officer has been specifically appointed to receive deal with such licenses. The G.O.

I agree with the asst. Secy that having opening the administration of the Pet. Rys & rules & the D'ship does not override the Statutory requirement that

Serial No.

a specific appointment should be made under the particular Section & rule empowering persons other than D^t Mgts. to be licensing authorities

4 In these circumstances, the attention should be made to the D^t. Mgts. Kind note is invited. This connection to pages 47 & 48 — Andhra Pet. Act

(1st member) MS. 7.4.32 7/4

(1). 4L The present position in regard to the authorities competent to issue licenses is not clear and it is desirable that orders should be issued defining the authorities who should deal with applications for licenses of different kinds.

(2). 43 Rules 1 and 2 under Chapter III authorise the issue of licenses coming under (a), (b), (c) and (d) of Rule 2 by District Magistrates, Presidents of the City Municipalities of Bangalore and Mysore, and the Vice-President, Kolar Gold Fields Sanitary Board. Are these officers now entertaining applications and dealing with them under this authority?

(3(a)). 44 In cases of importation, possession and transport of dangerous petroleum in quantities exceeding 40 gallons, the licensing authority according to Rule 2 is either Government or an officer appointed by Government for this purpose. No officer has been appointed to deal with such applications and it is apparently for this reason that all cases of this kind come up to Government through the Director of Industries & Commerce.

6037

I don't see any reason why all these applications should be sanctioned by Government. This duty is best devolved upon appropriate local authorities. Who such authorities should be, has to be considered. The British Indian practice seems to be to make ~~the~~ District Magistrates the authorities to deal with these applications. We might consider whether we might not also follow this practice. (3) (4).

4.5 If the Director of Industries & Commerce is appointed as the license issuing authority, he has no particular convenience to deal with these applications. He has no doubt the agency of the Superintendents of Industries, but the jurisdictions of these officers are very wide and they may not be able to attend to this work as promptly as the District Magistrates of the districts concerned.

Rule 2 states that "in all other cases, the licensing authority shall be Government". What these cases are, apart from those falling under (a), (b), (c) and (d) and apart from cases for the importation, possession and transport of dangerous petroleum in quantities exceeding 40 gallons, require to be clearly defined. What these cases are, may be noted and they will have to be dealt with by Government as the power cannot be delegated to any other authority.

4.6 Then, there is the question of inspection to be considered. In Notification dated 30th January 1925 the Industrial Engineer and the Superintendents of Industries have been vested with powers of inspection under

Serial No.

under Section 11 of the Regulation. It may be desirable to entrust the inspection work to the license issuing authorities or to officers subordinate to such authorities. It is not a desirable arrangement under which officers of one department issue licenses and those of another conduct inspections. Under the G.O. dated 30th January 1925, the Director of Industries & Commerce has been appointed as the provincial authority under Government for the administration of the Petroleum Regulation and the Rules thereunder. For the proper exercise of this authority ~~xxxx~~ this officer requires to be kept informed by license issuing and inspecting authorities of all matters that should be brought to his notice. What are all these matters and how often and in what form they should be reported, have also to be settled.

7. Information on points referred to above may be noted from the material available in the Secretariat and then the case may be referred to the Director of Industries & Commerce for the expression of his views.

4. With reference to First Member's ~~note~~ Minute, it is submitted as follows:-

The previous files on the subject are obtained and put up for reference.

Para 2. As regards applications being entertained by District Magistrates, Presidents of Bangalore and Mysore City Municipalities and the Vice President, Kolar Gold Fields Sanitary Board, No information is available on this point in this office. If necessary the information will be called for from the officers concerned and the Director of Industries and Commerce. It is however personally ascertained from the Director's Office that this procedure is being observed now.

3(a) With reference to the 1st part of para 3 of the Member's ~~note~~ minute kind reference is invited to the G.O. of 28th September 1926 authorising the Director of Industries and Commerce under Rule 2 (d) of the Ch.III of Petroleum Rules to issue special licenses for dangerous petroleum in cases where the capacity of the storage tank does not exceed 500 gallons.

(b) If after consulting the Director of Industries and Commerce, it is ordered that District Magistrates of Districts may be empowered to deal with applications for the importation, possession and transport of petroleum and to inspect, under Section 11 of the Petroleum Regulation, the storage premises, necessary action will be taken in the matter.

4). As regards cases other than those mentioned in Rule (2), (a), (b), (c) and (d) wherein the licensing authority shall

be Government. Kind reference is invited to the G.O. of 11th April 1929 ordering that the limit of 2000 gallons fixed in Rule 6 of Chapter IV of the rules for the possession of dangerous petroleum be removed so as to render it possible to grant a special license in Form "Q" for storing any reasonable quantity of dangerous petroleu over 65 gallons. This form "Q" was further revised in September 1931 and a revised form of special license "C" for the storage of petrol in underground tanks adjoining Kerbside pumps was adopted similar to that in force in British India.

5) Again another special license form "R" was introduced on 1st September 1931 with a view to provide for the storage of dangerous petroleum in tanks situated in bulk petrol depots throughout the State. Kind attention is also invited to license forms D, O and P of the Rules which have to be sanctioned by Government or by an officer appointed by Government in respect of the possessions of quantities of non-dangerous petroleum in a major installation, transport of dangerous or non-dangerous petroleum in bulk by a pipe line and possession of dangerous petroleum in bulk (i.e., in quantities exceeding 500 gallons in one receptacle).

6) With regard to matters that should be brought to the notice of the Director of Industries and Commerce who has been entrusted with the work of administration of the Petroleum Regulation and Rules, by license issuing and inspecting authorities, reference is invited to Section 3 of the Regulation which empowers Government to make rules

Serial No.

for carrying out the objects of the Regulation and the rules relate, among other matters, to the grant of licenses to import, possess or transport petroleum within the State, the storage thereof being subject to conditions laid down to ensure the safety of the persons having access to it and to prevent accidents by fire or explosion, to testing of various samples of petroleum and the results of such test, the fixing of fees payble for the storage and other licenses, the renewal of licenses and the conditions to be inserted therein and the penalties leviable for violation of Rules & the efficient and systematic inspection of lightning conductors on petroleum installations in the State. No information is available as to the form in which the report should be made.

53 Submitted for orders whether the file may be referred to the Director of Industries and Commerce for favour of remarks as ordered by the Member in the last para of his note (7).

NOTE—Contn. Sheet.

Y.O. No 41 of 31-32 & 22nd June 32

Returned with compliments -

56 It is better to note at the outset the work that is being attended to by the Director of Industries and Commerce in connection with the administration of the Petroleum Regulation and the Rules issued under it. All questions relating to the administration of the Regulation in the State receive his attention. He is authorised to issue licenses in Form "F" to the owners of - Motor Vehicles for the possession and transport of - dangerous petroleum upto 100 gallons. He is also authorised to issue special licanses in Form "Q" for the possession of Dangerous Petroleum in cases where the capacity of the storage tank does not exceed 500 gallons (vide G. O. No. IC. 2128-30/Geol. 29-26-3 dated 28th Septr. 26). The Director has also been given authority by Government to renew all the existing licenses sanctioned by Government for the possession, transport and importation of dangerous petroleum provided there is no change in any of the conditions as originally sanctioned by Government (vide Govt. Notification No. IC. 5497/Geol. 82-25-3 dated 5th Febry. 1926). All other applications for the possession and transport of petroleum, dangerous or not dangerous, not covered by Clauses, A, B, C, and D of Rule 2 Chapter III, Part II of the Petroleum Rules are dealt with by him and sanction of Government is obtained before the licenses are issued. The Director has also to -- satisfy himself that all storage tanks of the capacity of 10,000 gallons or more are connected with earth -- electrically (Vide Rule 8 Chapter I). He is assisted in this connection by the Superintendent of Commercial

Commercial Intelligence in the Office and by the Superintendents of Industries in the Districts.

57 The District Magistrates and the Municipal Presidents etc., referred to in Clauses A, B, C & D of Rule 2, Chapter III have been issuing licenses for the storage or transport of dangerous petroleum upto 40 gallons and also non-dangerous petroleum in minor installations, and for the transport of non-dangerous petroleum otherwise than in the pipe line. Every half year a statement is being received from these authorities furnishing the particulars of licenses issued by them during the previous half year. Any assistance that may be required in connection with the inspection of storage tanks and installations is being rendered to them by the Superintendents of Industries. Their inspection reports are forwarded to them through the Director, and so far, no difficulty has been experienced by them by this arrangement.

58 It is necessary that the present position with regard to the authorities competent to receive applications for licenses and ~~xxxx~~ also to issue them should be cleared. I would suggest for the consideration of Government that the Director may be empowered to issue licenses on his own authority for the storage and transportation of dangerous petroleum upto the extent of 2500 gallons. The authorities referred to in Clauses A, B, C & D of Rule 2 may continue to grant licenses to the extent they are permitted at present. In all other cases, the sanctioning authority may be Government

Government and licenses will be issued on receipt of - their orders in the matter. The rules 1 & 2 may be - suitably amended so that all applications for licenses may be made to the authorities competent to issue them. The District Magistrates and the Presidents of Municipalities will be kept informed of the licenses issued by me and also of the licenses issued under the orders of Government as and when they are issued. Particulars of licenses issued by them will be received by me once every half year as is being done at present.

5. Experience obtained so far with regard to the Adm tration of the Petroleum Regulation in the State has s that no inconvenience has been felt in this connection either by the principal oil companies or the agents or sub-agents in the State or by the general pu The existing practice has also resulted in uniformity as regard the administration of the provisions of the regulation. This uniformity has been secured by time instructions to the Superintendents of Industries and a careful scrutiny of their inspection reports. I am of opinion that it would be better if the present arrange -ments are continued subject to slight modifications as submitted above. In British India, licensing authorities for the issue of licenses, for the storage and transport of dangerous petroleum exceeding 40 gallons are the Dt. Magistrates or the Superintendents of Police. I understand that there has been a great lack of uniformity in the interpretation of Rules of the Regulation and that divergences have led to considerable correspondence with the oil companies and their agents. Expeditious disposa

Serial No.

disposal of applications is of essential importance to businessmen, and I am respectfully of opinion that the suggestions submitted by me would secure both uniformity and speedy disposal.

M. Ramesa Rao
22nd June 1932. Director of Industries.

66 This seems to be a fairly important matter and I should be glad to discuss the various points involved in it with the Asst. Secy. to Govt tomorrow
W
8.7.32
8/7/32

67 The Director's note is comprehensive. His recommendations may be accepted with the modification that in the case of District Magistrates, the limit may be raised from 40 to hundred gals. (In the case of the Dir., the proposal raising the limit from 500 to 2500 gals.)

68 W
T (Mr.) What are the corresponding limits up to which Authorities are empowered to issue licenses in British India?

Subd.

Ref: Member's minute dated 24/7/31

General and Revenue Secretariat

File No. Administration of the Petroleum Regulations of 193

24

[App. P. III—2

Serial No.

In reply to para 2 of the First member Minute dated 8.4.1932, the Director reports that the District Magistrates & the Municipal Presidents have been issuing licenses in cases ~~referred to~~ coming under (a) (b) (c) & (d) of rule 2 of Chap III of the Rules.

Please see para 3 of the Member's minute. The Director reports that at present he is attending to the following items

(i) All questions relating to the administration of the Regn.

(ii) Issue of licenses for the possession and transport of dangerous petroleum upto 100 gallons.

(iii) Issue of Special licenses for the possession of dangerous petroleum not exceeding 500 gallons.

(iv) Renewal of all existing licenses

(v) Receiving applications for all other licenses not coming under (a) (b) (c) & (d) of rule 2. for scrutiny & submn to Govt. sanctioned by Govt.

The Director suggests that ~~the D~~

(A) The Dt Magistrates & Presidents of Mchs may continue to grant licenses to the extent they are permitted at present.

(B) The Director may be empowered

to grant on his own authority for the storage & transport of dangerous petroleum ~~of~~ upto the extent of 2500 gallons

(c) that in all other cases, the sanctioning authorities may be Govt.

In support of his recommendations he states that no inconvenience has been felt till now by the public and that the existing practice has resulted in uniformity

In British India, the Dt Magistrate or the Supdt of Police are the licensing authorities for the storage & transport of petroleum & dangerous) exceeding 40 gallons

It is a matter for consideration whether in view of the fact that the Dt magistrates are responsible for public peace and safety within specific areas and have the Police Supdts to attend to the work promptly, the practice prevailing in British India may not be adopted in this State also though there is likely to be slight variations in the administration of the provisions of the Regulation as apprehended by the Director.

Serial No.

Other cases referred to in the Memo. Minute would be

Special licenses in forms Q, K D, O, & P etc.

Prevention of accidents.

Testing of samples.

Renewal of licenses.

Efficient & Systematic inspection of petroleum installations and lightning conductors.

As some of these matters require technical knowledge, the Supdt of Police or the district magistrates may require the assistance of technical men and it is apprehended that unless a technical officer is readily available in each district there will be divergence in practice & inefficiency for want of timely and prompt instructions from a Central authority.

The points for clearing up appear to be

(1) Whether the practice in British India should be adopted in toto here or

Whether the existing practice

May continue.

In the latter case Rules 1 to 2 will have to be suitably amended so as to make it clear that a Applications for license should be made to the Authority Competent to issue it ~~not~~ according to the nature of the case and the area in which ~~it will be operated upon.~~ it is to be operative.

(B) Whether the powers of the Dt Magistrates & Presidency may be limited to the cases coming under clauses (a), (b) (c) & (d)

(C) Whether the Director may be authorized to issue licenses upto a limit of Rs 500 gallons of danger & invested with other powers spec by a specific notification

(D) ~~Procedure~~ Whether a suitable form may be prescribed for the submission of Reports of Inspector under section 11 of the Regulation

Subd. Ref: Member's memo dt 24/7/32

A statement showing the authorities to issue licenses in different provinces British India is placed below for reference.

The Dt. Magistrate receive applications and are empowered to grant licenses upto certain limit. Above that the Govt is the sanctioning authority. In cities of Bombay, Calcutta and Madras, the functions of the Dt Magistrate are exercised by the Municipal Comr. the Comr. of Police or the Deputy Comr. of Police. Licenses for the storage of petrol on lands belonging to Govt authorities are issued by the said authorities, free of charge, with the previous sanction of Govt.

3rd K.T. 18/32 — Dev. Sec) — 5.8.32

70 no doubt the practice in Brit. Indian provinces is quite different from ours & the tendency there is to vest the power almost entirely in Dist. Magts: But we have followed a different method all along. In practice, it has worked quite well and we are not been inconvenienced thereby as pointed out by the Director.

To B. T. Kesaviengar, Esq., B.A.,
Secretary to the Government of Mysore,
Development Department, Bangalore.

SIR,

I have the honor to state that Mr. M. Venkataswamy, Proprietor, S. S. Motor Service, Sagar, has applied for the grant of a license for storing 1,000 gallons of petrol at Sagar. The prescribed fee of Rs 12/- has been credited by the party to the Taluk Treasury at Sagar on the 13th - Jany. 1931.

The storage shed is situated on the left side of the Shimoga - Sagar road between the Varada Tile Factory and the Revenue Sub-Divisional Office. It has on the South Mr. Karney's Petrol Storage shed at a distance of 57 feet and on the North the Varada Tile Factory at a distance of about 150 feet. There are no buildings to the East and West of the Storage shed. The shed measures 12' x 7' and has a capacity of 1,050 gallons of petroleum. It has earthen -- floor. The walls of the shed are built of laterite stones and the roofing and doors are of corrugated iron sheets. The floor of the shed is sunk to a depth of 2 feet below the surrounding ground level. There is a ventilating opening just above the door of the shed and it is protected by strong wire gauze. The required safety distance is kept clear all round the shed.

As it satisfies the conditions of the license form " B'

OFFICE OF THE DIRECTOR,

Dated, Bangalore,....1st..February....*1932*

FROM

N. RAMA RAO, Esq., B.A., B.L.,
Director of Industries and Commerce in Mysore,
Bangalore, (India.)

DEVELOPMENT SECRETARY. 2. FEB. 1932

B. T. KESAVIENGAR, ESQ., B.A.,
Secretary to the Government of Mysore,
Development Department,
Bangalore.

SIR,

3/2/32

Reference:- Application for licenses for storing petrol Messrs. M. Venkatasawmy & S.Devappa.

******

With reference to your letter No. D.3592 dated 18-1-1932 on the above subject, enquiring why the District Magistrate and the Sagar Municipality were not consulted in the matter, I have the honor to invite your kind referenoe to G.O.No.I.C.5210-76/Geol.2-24-4 dated 30-1-1925 transferring to the Director of Industries and Commerce the administration of the Petroleum Regulation and the Rules framed under it. All applications for licenses which can only be issued by Government or by the Officer appointed by them in this behalf are generally dealt with by me (Vide Rule 2; Chapter III, Part II of the Petroleum Rules). It is only in those cases where the District Magistrates or the Presidents of the Municipalities are competent to issue licenses under the Rules that applications are made to them direct by the parties concerned. The Superintendents of Industries inspect the storage installations when they have been completely erect-ed and submit detailed report furnishing full particulars of the installations. Each report is scrutinised carefully and if the installation is found to comply with the requirements of the Regulation and the Rules and also of the conditions endorsed on the license applied for, recommendation is made to Government, for the grant of the license.

The District Magistrates or the Municipalities concerned are not being consulted in the matter as there is no provision to that effect either in the Regulation or in the Rules issued thereunder. If the storage shed is erected on private land, care is taken to see that the location of the building is suitable and that the distance between the storage shed and the protected works all round is more than enough to meet the needs of the public safety. If it is on Government, or Municipal land, the applicants have first to obtain the lease of the land and then to proceed with the erection of the building thereon. Inspection of the storage sheds is made only when they have been completely erected. The lease of such lands is refused if they are not found suitable for the erection of a storage installation.

I request that orders of Government sanctioning the grant of licenses for the storage of petrol in favour of Messrs. M. Venkatasawmy and S.Devappa may kindly be obtained and communicated to me at an early date.

I have the honour to be,

Sir,

Your most obedient servant,

DIRECTOR.
